THE UNIVERD STAYLES OF AMJERIOA

TO ALL TO WHOM THESE PRESENTS SHALL COME;

Pioneer Hi-Bred International, Inc.

HICKOR, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED DISTINCT VARIETY OF SEXUALLY REPRODUCED, OR TUBER PROPAGATED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLED WITH, AND THE TITLE THERETO IS FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF TWENTY. YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE YET TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR UNING IT, OR CONDITIONING IT FOR PROPAGATION, OR STOCKING IT FOR ANY OF THE REPOSE, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROPAGATION OF THE PLANT VARIETY PROTECTION ACT. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

SOYBEAN

'93B82'

In Testimonn Thereof, I have hereunto set my hand and caused the seal of the Hant Incient Hentertian Office to be affixed at the City of Washington, D.C. this eighth day of May, in the year of our Lord two thousand one.

IF "YES" TO ITEM 18, WHICH CLASSES OF PRODUCTION BEYOND BREEDER SEED? GENERATIONS? FOUNDATION REGISTERED CERTIFIED YES 20. HAS THE VARIETY OR A HYBRID PRODUCED FROM THE VARIETY BEEN RELEASED, USED, OFFERED FOR SALE, OR MARKETED IN THE U.S. OR OTHER COUNTRIES? ✓ YES (If "yes," give names of countries and dates) U.S. - 1997 The applicant(s) declare that a viable sample of basic seed of the variety will be furnished with application and will be replenished upon request in accordance with such regulations as may be applicable, or for a tuber propagated variety a tissue culture will be deposited in a public repository and maintained for the duration of the certificate The undersigned applicant(s) is(are) the owner(s) of this sexually reproduced or tuber propagated plant variety, and believe(s) that the variety is new, distinct, uniform, and stable as required Section 41, and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act. Applicant(s) is(are) informed that false representation herein can jeopardize protection and result in penalties. SIGNATURE OF APPLICANT (OWING SIGNATURE OF APPLICANT (Owner(s)) Name (Please print or type) Name 6. John Grace III CAPACITY OR TITLE DATE CAPACITY OR TITLE

Exhibit A. Origin and Breeding History of the Variety

Soybean Variety 93B82

Variety 93B82 evolved from a 1988 cross of 9273/3/XB33B//A3733/RESNIK. XB33B is a selection from the cross of MO304/A3127.

It is an F5-derived variety which was advanced to the F5 generation by modified single seed descent. The F6 progeny row of 93B82 was grown in the summer of 1990. Subsequently, 93B82 has undergone four years of extensive testing and purification and has been observed by the breeder to be uniform and stable for all plant traits from generation to generation, with no evidence of variants. On the basis of multi-race resistance (Rps1k) to *Phytophthora megasperma*, very good field emergence and standability, and outstanding yield potential, variety 93B82 was released for sale.

The purification block was grown during the summer of 1994 and 26 sublines were bulked for increase. One acre of 93B82 (breeders seed) was grown in the winter of 1994-95. 304 acres of parent seedstock (foundation seed equivalent) were grown in the summer of 1996 and about 10,800 bushels were harvested.

Exhibit B. Statement of Distinctness

Soybean Variety 93B82

Soybean variety 93B82 is most similar to variety 9333. Both varieties have purple flowers, yellow seed with black hila, brown pod wall color, and multi-race resistance (Rps1k) to *Phytophthora megasperma*. However, 93B82 has light tawny pubescence whereas 9333 has tawny pubescence. Also, 9333 has resistance to labeled Roundup herbicides whereas 93B82 is susceptible. In addition, 93B82 and 9333 differ in their isozyme profiles at loci AC04, IDH1 and PGM1 (see Table 1 below).

Table 1. Isozyme Data

Exhibit D. Additional Description of the Variety

Soybean Variety 93B82

In Exhibit C we have identified variety 93B82 as susceptible to bacterial blight, brown spot, pod and stem blight, rhizoctonia root rot, bud blight, yellow mosaic, cowpea mosaic, pod mottle and seed mottle.

This does not mean that variety 93B82 is any worse for these problems than other varieties of similar maturity. Rather, we do not consider 93B82 to be immune to these problems. Therefore, we have chosen to be conservative and have identified the line as "susceptible".

Plant variety protection can be afforded only to owners (not licensees) who meet one of the following criteria:

- 1. If the rights to the variety are owned by the original breeder, that person must be a U.S. national, national of a UPOV member country, or national of a country which affords similar protection to nationals of the U.S. for the same genus and species.
- 2. If the rights to the variety are owned by the company which employed the original breeder(s), the company must be U.S. based, owned by nationals of a UPOV member country, or owned by nationals of a country which affords similar protection to nationals of the U.S. for the same genus and species.
- 3. If the applicant is an owner who is not the original owner, both the original owner and the applicant must meet one of the above criteria.

The original breeder/owner may be the individual or company who directed final breeding. See Section 41(a)(2) of the Plant Variety Protection Act for definition.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C. 20250, or call 1-800-245-6340 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.
